The Original

\\// **ELECTRONIC**  
**CAT MOUSE**™

\\// The "Purrfect" Litter Box Odor Eliminator

## The Natural Odor Eliminator

**OXYION™ GENERATOR**

*Ingeniously produces a balanced proprietary blend of beneficial Ions and Activated Oxygen, in the same levels as found in the best of Nature itself, to hygienically destroy odors and pollutants naturally!*

*The Only Lasting Byproduct Is Oxygen!*

**So powerful it can de-scent SKUNK Odor!**

**The Genuine, Original CatMouse™- Accept No Lesser, Inferior Imitations!**

# CATMOUSE™ QUICK START OPERATION GUIDE

*Please read the entire User Guide/Instruction Booklet before using*

1. Plug power cord into bottom of CatMouse unit.
2. Plug Power Supply Adapter into suitable wall power outlet.  
*(add suitable proper extension cord if needed)*
3. Mount or place the CatMouse in desired elevated location.
4. Push ON/OFF button until green light comes on.
5. Select HI/LOW output setting on the top edge of the CatMouse. (**Please Note:** FAN setting does not produce odor eliminating benefits, and is only used for Pheromone Diffusion purposes)

***That's it! Start Enjoying The Odor Free, Clean & Green Life!***

***Bring the  
natural  
cleaning action  
of fresh  
outside air,  
INSIDE your  
home while  
saving heating  
and air  
conditioning  
fuel energy  
costs!***

**OUT**

No Chemicals,  
No Fumes,  
No Toxins,  
No Mess,  
No More  
Expenses!  
Save \$100's Of  
Dollars Every  
Year!

**OUT**

No More Odors,  
No More  
Ineffective Toxic  
Coversups!

**IN**

Deodorize,  
Disinfect, Sanitize  
The Natural and  
Economical Way!  
As in nature, the only  
remaining byproduct  
is...Oxygen!

*The original Electronic Odor Eliminator will sniff out and devour your litter box and other odor problems... Instantly, Electronically, Naturally and Safely! Dollar for dollar, nothing on Earth is More Effective, Natural and Economical at Eliminating Odors than the CatMouse.™*

## Safety Symbol Definitions

**The purpose of the safety symbols is to attract your attention to possible dangers. The safety symbols and the explanations with them, deserve your careful attention and understanding. The safety warnings do not, by themselves, eliminate any danger. The instructions or warnings they give are not substitutes for proper accident prevention measures.**

### SYMBOL MEANING

#### **SAFETY ALERT SYMBOL:**

Indicates caution, warning or danger. May be used in conjunction with other symbols or pictographs.

**DANGER:** Failure to obey a safety warning will result in serious injury or death to yourself or others. Always follow the safety precautions to reduce the risk of fire, electrical shock, and personal injury.

**WARNING:** Failure to obey a safety warning can result in serious injury to yourself or to others. Always follow the safety precautions to reduce the risk of fire, electrical shock, and personal injury.

**CAUTION:** Failure to obey a safety warning may result in property damage or personal injury. Always follow the safety precautions to reduce the risk of fire, electrical shock, and personal injury.

**NOTE:** Advises you of information or instructions vital to the operation or maintenance of the equipment.

**DANGER:** Keep away from water sources including rain, bathtubs, sinks and pools.

**DANGER:** Keep away from children. It is not a toy!

**DANGER:** Do not use in explosive air environments, near gas vapors, or other flammables, etc.

**DANGER:** Never place any living thing (including pets) inside a totally closed small container with the CatMouse™ for any extended period of time. Activated Oxygen (O3) is NOT life sustaining as is Oxygen (O2). The CatMouse™ can be safely used in the presence of small animals and humans wherever normal airflow exists.

**WARNING:** Do not further dismantle the CatMouse™ other than for cleaning the unit as instructed to avoid damage to internal parts.

**WARNING:** Maintain a distance of at least 24 inches (60.96 cm) from top grill of CatMouse™ if exposed to it continuously for very prolonged periods of time (ie: while sleeping or watching TV, etc.).

**WARNING:** For individuals with a history of respiratory disease or sensitivity: The CatMouse™ entirely complies with U.S. safety standards for low Activated Oxygen (O3) emission (less than 0.04 ppm, less than typically found in natural fresh, clean outside air). Persons with a history of respiratory disease should seek the advice of their physician regarding possible rare sensitivity to low levels of Activated Oxygen (O3). For the vast majority of individuals, the negative health effects of pollutants, toxins, germs, bacteria, mold, pollen, etc., can be far more intolerable and unhealthy than the brief, minute exposure to nature's own oxidizing pollution fighter.

**NOTE:** A static electricity sound may be emitted from the CatMouse™ in the event it comes into contact with high levels of humidity. This is NOT a malfunction.

**NOTE:** Unplug if not used for extended periods of time.

**OXYIONS™ .....****The Earth's Most "Purrrfect" Deodorizer**

There's a new natural odor eater in town and it's declaring war on all ODORS! The Electronic CatMouse™ devours odors and toxic pollutants with Oxyions™ and eventually leaves behind only beneficial, healthy oxygen and ions in the process, just as Nature does everyday! The CatMouse™ meets all regulatory compliance standards.

Thanks to new micro-electronic advances, this powerful commercial grade deodorizing technology is now available in the low cost, miniature electronic CatMouse™...for use by virtually everyone!

Nature already invented the "Purrrfect" miracle deodorizer eons ago...Oxyions™, a natural balance of Activated Oxygen (O3) and negative Ions! Oxyions™ are produced by Nature from sunshine, lightning storms, rain showers and waterfalls for example. Just as in Nature, the electronic CatMouse™ produces Oxyions™, to clean the earth's air supply and environment. Without them, we would likely all die of putrefaction from our planet's pollutants, waste, germs, bacteria, molds, viruses, fungi, etc. Now, YOU can harness nature's miracle, safely, right in your own home, with the same beneficial results!

The CatMouse™ is the "Purrrfect" deodorizer because it completely destroys odors, germs, viruses, bacteria, mold, mildew and most pollutants– and the only remaining byproduct is eventually pure oxygen! Activated Oxygen (O3) quickly starts to revert to pure Oxygen (O2) in about 30 minutes, leaving no toxic residues or pollutants. Nature's Activated Oxygen (O3) has a half-life of about 30 minutes, meaning it reduces itself by half about every 30 minutes. Initial half-life reduction is fast because the concentrated Activated Oxygen (O3) will immediately start attaching itself to pollutants, odors and microorganisms, destroying them in the process. Any "residual Activated Oxygen (O3)" will remain and reduce at a slightly slower pace but still, about every 30 minutes.

The CatMouse™ emits Oxyions™ at the same levels as fresh country air. Actually, fresh clean country air (not polluted city air) can often naturally contain twice the Activated Oxygen (O3) levels as the CatMouse™ produces or government regulations typically allow. Opening your windows to let fresh air into your home could, therefore, exceed regulatory limits! Ridiculous? Yes, once you know the facts. Remember these are the same regulatory government agencies that convinced you to eat Transfats for decades, not realizing they were up to eight times more likely to clog your arteries than natural butter! Hence the famous

comedy line; "I'm from the government and I'm here to help." Their cure is often more harmful than the problem!

In fact, the Activated Oxygen (O3) portion is actually Nature's Miracle disinfectant and deodorizer. It is routinely used commercially to disinfect and deodorize hospitals, commercial kitchens, gyms, hot tubs, drinking water and swimming pools, etc. By law, every bottle of drinking water must be disinfected with it!

Even when dissolved in water, it makes a highly effective and safe disinfectant which is non-toxic, non-staining and works great. Activated Oxygen (O3) is 13 times more soluble in water than Oxygen. Activated Oxygen (O3) disinfects 3,100 times faster than chlorine! Super oxygenated (ozonated) water stays at full strength for only approximately 15 minutes. The Activated Oxygen (O3) then again reverts back to oxygen, leaving no harmful pollutant residuals behind, while having effectively destroyed pathogens (bacteria, viruses, fungi, mold, etc.). Ozonated water is used for safely and instantly cleaning stains from clothes, carpets, upholstery and furniture. It is also effective for sanitizing countertops, vegetables or a multitude of other surfaces.

Activated Oxygen (O3) is also erroneously referred to as ozone. Media ignorance has cast an undeserved negative stigma on nature's environmental purifier by incorrectly naming it as a pollutant. In fact, it is nature's much needed reaction to man made pollutants! It destroys the pollutants, then amazingly reverts back to oxygen and clean air. Ozone alerts are therefore actually pollution alerts! It is nature's response to the need to clean man-made pollutants from our air, not the other way around. Nature's ozone is not the problem– pollution is the problem. Nature's own ozone (air bleach) is the answer to destroying pollution. We couldn't live without it! Just as big Drug Company lobbyists push profitable Drugs (with killing side effects) and undermine Natural Health, big Chemical Company lobbyists push profitable (but toxic) Chemicals and undermine Nature's existing simple, low cost solutions, such as Nature's Ozone (O3).

Activated Oxygen (O3) has been the only viable, long-term method for removing the most difficult odor problems in nature and commercially. Removing smoke, soot and dead animal odors from buildings, automobiles and homes, have all been best accomplished with Activated Oxygen (O3). Only Activated Oxygen (O3) can permeate every crack & crevice and attack and chemically alter the odor causing compounds themselves, rendering them inert, ultimately leaving only fresh Oxygen(O2) when its work is done! It's Nature's Miracle.

If it weren't for the oxidizing power of Nature's Activated Oxygen (O3) in Oxyions™, our entire planet would be, in all probability, one putrefied, smelly, toxic, mess! It's Nature's answer to destroying the Earth's pollutants, and now you can own, control and enjoy the many benefits of Nature's Activated Oxygen (O3) miracle anywhere in your own home, easily and inexpensively! You can destroy odors, toxins, bacteria, germs, viruses, molds and more...naturally, effectively and safely!

**Inexpensive • Compact • Powerful • Safe & Healthy Residual Byproduct**  
**Replaces hundreds of toxic deodorizing & disinfecting**  
**chemical products and expense!**

The CatMouse™ – Nature's own miracle deodorizer is so effective it can de-scent a skunk! If it can do that, and eliminate extremely difficult litter box odors, imagine the hundreds of other uses for this amazing little device in your home! If you can think of it, you can deodorize and disinfect it– with the CatMouse™!

Due to the compact size of the CatMouse™, it is most effective for its designed purpose: cleaning and deodorizing small areas and items. You can treat virtually any object by simply placing the CatMouse™ above, within, or in close proximity to, it. The CatMouse™ can be placed in large plastic storage boxes, garment bags, shoe boxes, pantries, hope chests, garbage cans, diaper pails, even in small closets. It is also very effective on hamper lids and near the laundry chute! Activated Oxygen (O3) is heavier than air and therefore flows downward, so placing the CatMouse™ slightly above the object to be treated is beneficial.

### **THE FILTHY FACTS**

*Germs, bacteria and viruses not only threaten us...they can kill!*

*New scientific evidence is emerging pointing to germs as a link to inflammation-causing heart disease, even cancer.*

*The typical office desk area has 400 times the amount of bacteria than the average toilet seat. Worst offenders: phones, staplers, keyboards and your computer mouse! Worldwide, money is the filthiest of all items handled, and your wallet is a virtual breeding petri dish for bacteria. Purses and briefcases are also among the dirtiest, worst offenders. These items are routinely set down on the filthiest surfaces imaginable (like airport toilet floors) and then innocently and unconsciously placed on desks and even kitchen countertops, which you EAT from! No wonder so many people are sick and health care costs are skyrocketing.*

## FREQUENTLY ASKED QUESTIONS

### What are Oxyions™?

**Oxyions™ are a carefully crafted proprietary blend of Negative Ions and Activated Oxygen (O3), produced in the same proportions as found in the best of nature.** This effectively brings the benefits of fresh clean country air inside, without energy loss or security risks. It's like opening a window after a cleansing lightning storm...electronically! The Activated Oxygen (O3) portion is nothing more than natural Oxygen (O2) with an additional Oxygen atom, created by a high electric charge (as in lightning). In nature it is produced by the sun's ultra-violet rays, high voltages associated with thunderstorms and waterfalls. It leaves you with the fresh, clean, sweet, smell associated with the passing of heavy rain. In the case of Activated Oxygen (O3) Generators, Activated Oxygen (O3) is created by a high voltage (but harmless due to low current) electrical charge that occurs within the unit.

### How Do Oxyions™ Work?

As in nature, Negative Ions and Activated Oxygen work synergistically to purify our world. The Activated Oxygen (O3) portion has an extra Oxygen atom which is unstable and therefore, seeks out microorganisms such as viruses, molds and bacteria, chemicals odors and other materials that will assist in oxidation and help it turn back to its original form, Oxygen (O2)! As it finds these agents, it will bind to them, oxidize them and leave behind only pure Oxygen (O2).

### Are Oxyions™ Harmful?

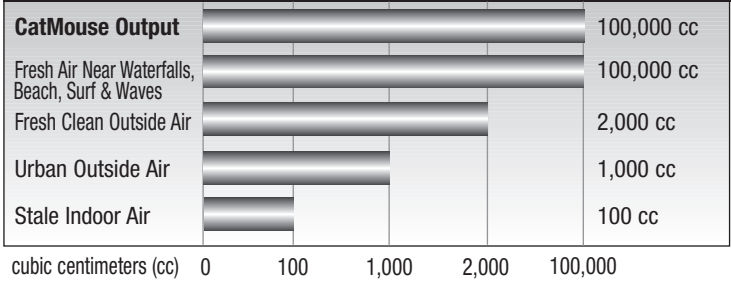

Negative Ions are not only completely safe, they are essential to a healthy life. The Activated Oxygen (O3) portion, at the levels emitted by the CatMouse™, are completely safe when used as directed. The Maximum Acceptable Concentration (MAC), as established by OSHA, is 0.10 PPM for 8 hours per day, 5 days a week. Activated Oxygen (O3) can be an irritant in very high concentrations. The CatMouse™ has an Activated Oxygen Output of only .01 to .04 ppm - well below FDA, EPS, OSHA and NIOSH limit standards. You can rest easy knowing your CatMouse™ is completely safe for you and your pet(s) and will help you maintain better health in a cleaner, more odor-free, pathogen-free environment. Unlike many chemical cleaners, there has NEVER been a reported fatality from any use of Activated Oxygen (O3) under any circumstances!

### What is the Life of Activated Oxygen (O3)?

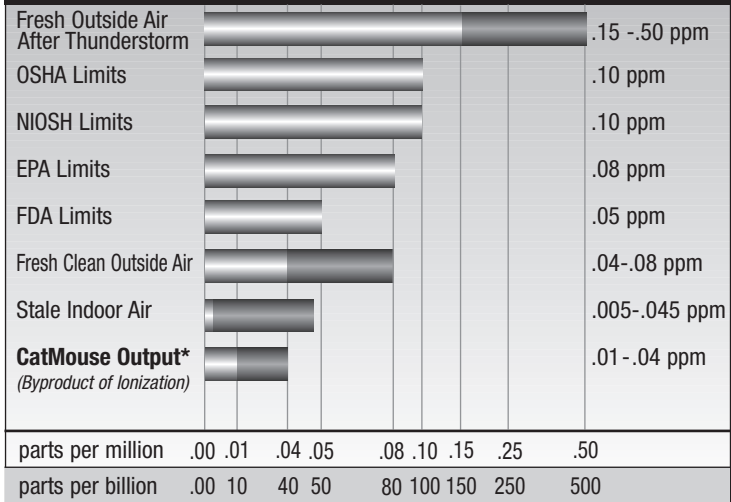

Nature's Activated Oxygen (O3) has a half-life of about 30 minutes, meaning it reduces itself by half about every 30 minutes. The CatMouse™ deodorizes "Purrfectly" because it completely destroys all odors, germs, viruses, bacteria, mold, mildew and most pollutants, and the only remaining byproduct is Oxygen! Activated Oxygen (O3) quickly starts to revert to pure Oxygen (O2) in about 30 minutes, leaving no toxic residues or pollutants behind. Initial half-life reduction is fast because the concentrated Activated Oxygen (O3) will immediately start attaching itself to pollutants, odors and microorganisms, destroying them in the process. Whatever "residual Activated Oxygen (O3)" is left will remain and reduce at a slightly slower pace, about every 30 minutes. Any remaining Residual Activated Oxygen (O3) can also be quickly dissipated by simply "airing out" the item and/or area at any time.

## Nature's Balanced OXYIONS™ Composition

### Beneficial Mood Lifting, Air Cleaning Ion Levels

### Natural Disinfecting Activated Oxygen (O<sub>3</sub>) Levels

\*CatMouse output is regulated to meet government agency limits which are, as shown above, actually far below those found beneficial by nature itself.

**Why is the CatMouse™ so superior to air fresheners and cleaners?**

The CatMouse™ attacks the problem instantly on the molecular level, just as nature does, completely eliminating the chemicals causing the odors, as well as hygienically killing germs, bacteria, molds, mildews and fungus in the entire area including all surfaces, carpets and more!

**Aerosol Sprays and plug-in deodorizers** create more pollutants than they cover up, by adding even more toxic allergenic chemicals into your home and on your possessions. They also cost an ongoing exorbitant amount of money to use. They are bad for you and bad for your environment!

**Fan Driven Air Filters.** Only the air driven through the noisy, energy-consuming fans is filtered and cleaned. Even charcoal filters do not kill and remove a fraction of the pollutants and toxins the CatMouse™ can. The CatMouse™ cleans, deodorizes and disinfects the entire area and everything in it, only leaving behind nature's oxygen! It's Nature's Miracle.

**Effectively removes Allergens and other Pollutants**

Activated Oxygen (O3) and beneficial high Negative Ion concentration produced by CatMouse™ effectively and most economically removes just about any type of airborne pollutant:

**List Of Pollutants Removed By OXYIONS™**

ACTIVATED OXYGEN O <sub>3</sub>		NEGATIVE IONS
Odors & Fumes	Nicotine	Solid Air Particles
Germs	Acrylic	Animal/Pet Dander
Viruses	Chemical Odors	Bacteria/Microorganisms
Mildew	Acid Odors	Insect Feces (Allergenic)
Bacteria	Gases/Fumes	Dust
Staphylococcus	Benzene	Dust Mites
E-Coli	Ammonia	Pollens
Fungi	Mold/Mold Spores	Mold Spores
Cigarette Smoke	Fertilizer Chemicals	Chemicals
Algae	Oils	Volatile Organic Compounds (VOCs)
Formaldehyde	Resins	
Exhaust fumes	Carbolic Acid	
Carbon Monoxide	Propane	
Tetrachloride	Ether Alcohol	
	Industrial Waste	

### **High Density Negative Ion Output**

The CatMouse™ utilizes 3 corrosion-resistant stainless steel needlepoints to generate a high concentration of beneficial Negative Ions. The needlepoint ionization system provides the highest level of beneficial, healthful Negative Ions in comparison with other methods.

### **Long Lasting, Durable**

Because the CatMouse™ needlepoints are constructed of stainless steel, they resist corrosion unlike other needlepoints typically made of less durable materials. A typical needlepoint will erode and produce only a low level of ion after the initial few months of operation. Stainless steel needlepoints will continuously provide a consistent level of high ion output for the life of the unit. **Built to last!** (Simple routine maintenance is required for optimal results.)

### **Whisper Quiet Operation**

The CatMouse™ deodorizing unit is virtually silent, even when activating the Pheromone Therapy Diffuser Fan, when set to the Fan only mode (located on top of unit).

### **Compact and Stylish**

The small dimensions, attractive design and unobtrusive composition of the CatMouse™ make it easy to place anywhere! The exterior is covered in a mouse gray velvet to complement any interior decor.

### **Saves Time & Money**

The CatMouse™ requires little maintenance and virtually no replacement costs! Due to minimal power consumption, it only costs pennies to run the CatMouse™. It will replace many very expensive, even toxic, household deodorizers, polluting air fresheners and the time and costly expense needed to purchase them. Over the course of a year, you could save many hundreds of dollars!

### **Pure, Clean Scent while Eliminating and Destroying Odors**

The combination of Ionization and Activated Oxygen (O3) results in a fresh, clean, sweet smell, while consuming, destroying and neutralizing hundreds of odors, fumes and other chemical compounds.

### **Safe Activated Oxygen (O3) Output**

Only the required, effective minimal amount of Activated Oxygen (O3) is produced by the CatMouse™, just as in Nature, making it safe to operate, even in small areas. It operates well below the U.S. FDA limits of below .05 ppm output level, as well as the OSHA, EPA, and NIOSH health limit standards.

**Optional Pheromone Therapy Diffuser**

The optional Pheromone Therapy Diffuser Basket and Wick offers the opportunity to administer Veterinary recommended Pheromone Therapy (such as Feliway®\*) to de-stress or acclimate cats to new surroundings and/or break them of unacceptable behaviors.

**Can Help Increase Comfort and Relaxation While Still Maintaining Alertness**

Scientific studies show that the adrenaline levels are lower in the presence of Negative Ion conditions for man and animals alike.

**Can Improve Disposition, Stamina and Stress Levels**

Superior clean, high Negative Ion air quality as produced by the CatMouse™ Oxyions™ can improve your and your pets health, energy and mood. At Yosemite Falls, one may experience over 100,000 Negative Ions per cubic centimeter. This is far from the meager 100 Negative Ions per cubic centimeter found in many polluted air tight, homes of today.

The high Negative Ion concentration and Active Oxygen (O3) produced by the CatMouse™ effectively removes just about any type of airborne pollutant. This includes allergens, chemicals, odors, bacteria, viruses and many other types of pathogens and compounds. There are endless benefits and features to having a CatMouse™ in your home and in your life:

- Naturally kills odors without toxic waste, cost, cover-up scents or fragrances. Nothing left behind but oxygen! Even eliminates smoke!
- Safe Oxyion™ output with a fresh, clean, sweet smell
- Whisper quiet operation in any mode
- Ultra-low 3 watt power consumption (half that of a nightlight)
- Exceptionally high, beneficial and cleansing Ion output
- Stylish low profile, compact design in a versatile, attractive mouse gray finish
- Place anywhere! Generous 5 ft. safe, low voltage power supply cord allows convenient and versatile placement
- Low maintenance, durable stainless steel, Activated Oxygen (O3)/Ion generating needle points
- Includes 110V AC Power Supply, Pheromone Therapy Diffuser Wicks, repositionable mounting strips and complete Instruction & User Guide

\*Feliway® is a registered trademark of Farnam Company

**DANGER:** Keep away from water sources including rain, bathtubs, sinks and pools.

- 1) Plug 110V AC power low voltage safety adapter into wall outlet.
- 2) Connect the other end of cord into the bottom jack of CatMouse™ unit.
- 3) Press the "ON/OFF" button once (fig. 1). The green LED power indicator will light up indicating the unit is activated and ready to work properly, after selecting the desired function.
- 4) To adjust level of odor elimination, locate top edge of unit. Find the "HI/LOW/FAN" switch (fig. 2).

figure 1

- **HI** Push switch to far left for the HI mode which emits the units maximum amount of Oxyions™ for maximum odor control.
- **LOW** Push switch to middle for the LOW mode which emits intermittent Oxyions™ in one minute on/one minute off intervals, for moderate odor control.
- **FAN** Push switch to far right for the FAN mode, which activates the fan only for Pheromone Therapy distribution.  
**NOTE:** No Oxyions™ are produced in this mode.

figure 2

- 5) Press the "ON/OFF" button again to turn off the unit. Press again to turn on unit in the pre-selected mode as desired.

**WARNING:** Use only Diffusion Therapy specifically designed for cats. DO NOT USE essential oils designed for humans, for example, which can be toxic to cats. Always consult your veterinarian.

- 6) To use the optional Pheromone Therapy Diffuser Feature: Turn unit upside down. Using a coin, turn Pheromone Therapy Diffuser basket cover counter-clockwise to unscrew (fig. 3) and remove from the CatMouse™. Remove lid at bottom of Pheromone Therapy Diffuser basket by prying off and then install a felt aroma wick (fig. 4). Place a couple drops or mists of Pheromone\*\* or essences\*\* designed for cats on felt aroma plug (Feliway®\* is specially formulated and Veterinarian recommended for calming cats and preventing cats from spraying outside their litter box). Put felt plug into Pheromone Therapy Diffuser basket, replace lid and gently screw Pheromone Therapy Diffuser basket back into the CatMouse™. Select the "FAN" position on the HIGH/LOW/FAN switch on the top of the unit (see fig. 2).

figure 3

figure 4

\*Feliway® is a registered trademark of Farnam Company

\*\*Not included

## 7) Mounting your CatMouse™:

**Option #1** Keyhole Mounting: Simply tap a small nail, pin or screw and anchor provided, onto desired wall surface. Mount by placing the keyhole located at the back of the CatMouse™ over the nail, pin or screw (fig. 5).

**Option #2** Repositionable Mounting Strips: Separate opposing repositionable mounting strips. Remove adhesive backing paper from one side and attach to desired location. Remove adhesive backing paper from other side and attach to the CatMouse™. Secure unit to desired location (fig. 6). **Note:** Do not cover keyhole, Therapy Diffusion Basket or labels with mounting strips.

figure 5

figure 6

## 8) Litter box Installation Options

**NOTE: Oxyions™ are heavier than air and migrates downward, thus it is recommended to place the CatMouse™ higher than the object or area you are deodorizing and disinfecting.**

## OPEN LITTER BOXES:

A. Simply mount the CatMouse™ about 1-3 feet above and near (within 2 feet) open litter box (fig. 7).

figure 7

## COVERED LITTER BOXES:

**WARNING:** If placing on top of a covered litter box, removal of litter box access door is highly recommended.

A. Mount the CatMouse™ on top of covered litter box near opening (fig. 8).

figure 8

**DANGER:** Litter box access door must be removed for adequate ventilation.

B. Mount the CatMouse™ on vent opening on top of some covered litter boxes making sure there is adequate space surrounding the CatMouse™, allowing air flow of Oxyions™ into vent openings, if available (Fig. 9).

figure 9

Every one to three months, check and clean stainless steel emitter and cover as necessary.

**DANGER:** Always unplug the CatMouse™ unit before performing any maintenance.

1) Unplug the CatMouse™ unit.

**CAUTION:** Never use solvents or harsh chemicals to clean any portion of the CatMouse™.

2) Simply lift up emitter access cover vent grill at finger recess area and remove (fig. 1). Brush and/or rinse off grill area as required. Always thoroughly dry vent grill before reinstalling.

3) Lift out stainless steel emitter by pulling straight up and out (fig. 2). Gently brush, wipe and/or rinse off (fig. 3). Always dry emitter thoroughly before reinstalling. Carefully re-align emitter with indentations on each side and reinstall by GENTLY pushing into place.

4) Reinstall emitter access cover vent grill.

**DANGER:** Keep the CatMouse™ unit itself away from water sources including rain, bathtubs, sinks and pools.

5) Plug in unit, turn power switch to ON (fig. 4). Select HI/LOW position. Check to see if three purple glowing dots are visible in darkened room assuring proper operation. An ionic breeze can also be felt from the top vent while in operation, as well as, the presence of a sweet, fresh fragrance.

**WARNING:** Do not directly inhale the Activated Oxygen (O<sub>3</sub>) within 24 inches (60.96 cm) for extended periods of time (such as during sleep).

figure 1

figure 2

figure 3

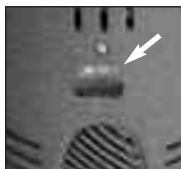

figure 4

To keep your CatMouse™ unit operating at absolute peak performance in heavy, constant use on HI, we recommend inspecting and cleaning it monthly as needed.

*The CatMouse™ utilizes the latest technology and solid state, micro electronic circuitry, to produce high quality, high output, reliable safe results.*

**Oxygen™ Production:** 100,000 ions per cubic cm at 25 cm (9.84 in.) distance

**Negative Ionizer:** Needlepoint ionization (highest ion-producing method available) using surgical stainless steel electrodes (to prevent corrosion)

### **Activated Oxygen (O3)**

**Portion Output:** .01 to .04 parts per million similar to fresh outside air and well below FDA Limit Standards of .05 ppm and EPA Limit Standards of .08 ppm per 8 hour interval, less than half of OSHA Limit Standards of 0.10 ppm per 8 hour interval and NIOSH Limit Standards of 0.10 ppm limit, and is lead free RoHS compliant

### **Natural Byproduct of**

**Needlepoint Ionization:** Activated Oxygen (O3) then Oxygen (O2)

### **Half-life of**

**Activated Oxygen (O3):** About every 30 minutes, 50% of the Activated Oxygen (O3) produced converts to pure oxygen (O2) until it's eventually, virtually completely converted to natural Oxygen (O2)

**Adjustable Settings:** HI/LOW/FAN

**Electrical:** 12VDC from 110VAC power supply adapter  
Optional 12V vehicle adapter and  
220VAC power supply available

**Cord Length:** 5 feet (1.52 m)

**Power Consumption:** 3 watts, 120V Power Adapter

**Dimensions:** 2"(50mm) H x 3.5" (90mm) W x 5.5" (140mm) L

**Weight:** 6.3 oz. (180 g)

**Enclosure:** Environmentally safe, tough, corrosion resistant, ABS & PVC plastics

**Warranty:** See full warranty on following page

US Imagineering, Inc. warrants this product under a 90-day limited warranty for defects in manufacture or workmanship.

For all warranty issues, a Return Authorization number & Proof of Purchase is required, please contact US Imagineering, Inc. at [www.InstantFreshAir.com](http://www.InstantFreshAir.com) and click on Warranty>Returns for complete instructions. The return shipping cost is the responsibility of the customer; therefore, returned products must be shipped prepaid and insured. **CODs are not accepted.** Original shipping fees are non-refundable. Products repaired or replaced under warranty will not incur reshipping charges. Under this warranty, the sole remedy shall be repair, exchange, or replacement at USI's discretion.

This warranty does not cover any charges for labor, downtime, or any other consequential or incidental damages resulting from the sale, use or improper functioning of the product. The warranty does not cover product failures due to misuse or abuse, improper maintenance, normal wear and tear, typical required periodic replacement products or circumstances beyond the control of USI.

**LIMITATION DAMAGES:** US IMAGINEERING, INC. SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES FOR BREACH OF ANY EXPRESS OR IMPLIED WARRANTY ON THIS PRODUCT.

EVERY EFFORT HAS BEEN MADE TO INSURE THE COMPLETE ACCURACY OF THE CONTENTS OF THIS MANUAL. NO LIABILITY ARISING FROM ITS USE, HOWEVER, CAN BE ACCEPTED BY THE COMPANY, WHO RESERVES THE RIGHT, WITHOUT PRIOR NOTICE, TO ALTER THE SPECIFICATIONS, CONSTRUCTION, OR CONTENT OF ITS EQUIPMENT AT THE COMPANY'S OWN DISCRETION.
